PLANT MECHANIC (M/F/D) BRANCH OF SANITARY,- HEATING AND AIR-CONDITIONING TECHNOLOGY

Information about apprenticeship

The vocational training at a glance

Tasks

Plant mechanics for sanitary, heating and air-conditioning technology work in the assembly and maintenance of complex plants and systems in supply engineering. They install and maintain supply and disposal technology facilities and systems, they assemble and dismantle, transport and secure pipelines, ducts and components of systems. Furthermore plant mechanics for sanitary, heating and air-conditioning technology install regulating, control, safety and monitoring equipment, adjust and check them. Inspections, maintenance and repair are also part of their duties. They frequently advise and support customers with regard to the products and services of the company. In addition, they hand over the technical supply plants and systems to the customers and instruct them on the operation of the plants.

Skills

Skills in crafts and technical knowledge are significant for the practical use of metal processing and metal joining technologies. Good mathematical skills are advantageous when calculating the material requirements.
