- Recognised vocational training in accordance with the German Vocational Training Act (BBiG)
- Vocational training within the company, the vocational school and training centers

PROCESSING MECHANIC, BRANCH OF NATURAL STONE (M/F/D)

Information about apprenticeship

STREICHER

The vocational training at a glance

Tasks

Processing mechanics gain and process mineral and ceramic raw materials into products. They take over the dismantling work of the natural stone and are also active in the further processing. Their activities also include the adjustment work on the machines as well as the monitoring of the production and further processing. Processing mechanics work in raw material extraction plants as well as in further processing and finishing plants.

Skills

Good knowledge of mathematics is an advantage in order to be able to calculate, for example, mixture ratios of raw materials and sub-products correctly. Future processing mechanics should be able to read technical drawings or make sketches and process flowcharts. Knowledge in the fields of works and technology is essential for the handling of machines and equipment.

Training Period

The **training period is 3 years** and takes place in the company, the vocational school and in training centers.

Qualification

CSE is required.

Location

The vocational training as processing mechanic, branch of natural stone takes place at our **location in Oelsnitz/Vogtland**.
