ARCHITECTURAL DRAUGHTSMAN, BRANCH OF STRUCTURAL ENGINEERING (M/F/D)

Information about apprenticeship

The vocational training at a glance

Tasks

Architectural draughtsmen/-women create drawings and architectural documents for construction works depending on their focus of activity, e.g. for houses and industrial structures, bridges and auxiliary constructions. Additionally, they usually work with CAD programs on the computer. According to drafts or instructions from civil engineers, they create floor plans, construction and installation drawings, building views and detail drawings. Besides the graphic work, they carry out specific calculations. Thereby, they calculate the demand for material, create stock lists and measurements. A key requirement is to be permanently in touch with the construction site. On-time deliveries and the accurate execution of working docments are essential. If necessary, architectural draughtsmen/-women also prepare design documents for invitation to tenders.

Skills

In order to make accurate and standardised drawings, accuracy is inalienable. Skills in crafts and technical knowledge are required in order to create design and detail drawings. Furthermore, background knowledge in data processing is advantageous for computerised drawings.

Training Period

The **training period is 3 years** and takes place dual in the company and at the vocational school.

Qualification

GCSE (technical branch) is required.

Location

The vocational training as architectural draughtsman/-woman, branch of structural engineering takes place at our **location in Deggendorf**.
