- Vocational training within the company, the vocational school and training centers

CHEMICAL LABORATORY WORKER (M/F/D)

Information about apprenticeship

STREICHER

The vocational training at a glance

Tasks

Chemical laboratory workers use wet chemical and instrumental analytical methods to determine organic and inorganic substances, to check their qualitative and quantitative compositions, to determine substance constants and chemical key figures. Test and analysis results are logged and evaluated by chemical laboratory workers and they serve laboratory equipment and computers, clean and identify substances and produce organic and inorganic preparations. Furthermore, chemical laboratory workers prepare experiments and carry them out by means of thermal separation processes at STREICHER's own laboratory facilities.

Skills

Knowledge and a high interest in chemistry, mathematics and other sciences should be available. A safe handling of computers is required for the evaluation and presentation of the results. In addition, responsible work to maintain safety and environmental regulations when handling chemicals and equipment is essential.

Training Period

The **training period is 3.5 years** and takes place in the company, the vocational school and in training centers.

Qualification

GCSE is required.

Location

The vocational training as chemical laboratory worker takes place at our **location in Niederwinkling**.
