- Vocational training within the company and the vocational school

CHEMICAL TECHNICIAN (M/F/D)

Information about apprenticeship

STREICHER

The vocational training at a glance

Tasks

Chemical technicians produce chemical products from organic and inorganic raw material, such as paint, agricultural pesticides, detergent or cosmetic products. Therefore, they use computerised machinery and production lines. They measure raw materials and fill them into containers, start up the production facilities and heat, cool or distill the raw material. Thereby, they supervise the production process. During the manufacturing, chemical technicians control the measuring value regularly and take samples in order to test the product quality. They record the production process and monitor the packaging of the finished products on filling and packaging systems. Furthermore, they service and repair the production facilities.

Skills

Skillfulness is necessary when repairing and servicing production facilities or for testing samples. Furthermore, technical understanding is required for maintenance work on production facilities. Sense of responsibility is indispensable as to meet the safety and environmental regulations.

Training Period

The **training period is 3.5 years** and takes place in the company and at the vocational school.

Qualification

GCSE is required.

Location

The vocational training as chemical technician takes place at our **location in Niederwinkling**.
