# ELECTRONIC TECHNICIAN, BRANCH OF ENERGY AND CONSTRUCTION TECHNOLOGY (M/F/D)

## Information about apprenticeship

**STREICHER**

## The vocational training at a glance

### Tasks

Electronic technicians specialised in energy and construction technology assemble control equipment in buildings and data networks or control and regulation systems for heating installations, ventilation or air-conditioning systems. Therefore they develop control programs, define parameters, measure electrical values and test the systems. Electronic technicians install reception and broadband communication systems as well as telecommunication networks. When carrying out maintenance work, they test the electrical safety devices, determine the cause of any faults and fix them.

### Skills

Interest in physics and mathematics is essential since knowledge in electrical science is inalienable in order to calculate material requirements. Skills in crafts and technology are helpful when carrying out installations or maintenance work, technical drawing experience when creating plans. Knowledge in information technology facilitate the access to programming and computer-based work processes.

### Training Period

The **training period is 3.5 years** and takes place in the company, the vocational school and in training centers.

### Qualification

**CSE** is required.

## Location

The vocational training as electronic technician, specialised in energy and construction technology takes place at our **locations in Deggendorf**.
