- Vocational training within the company and the vocational school

## AUTOMOTIVE PAINTER (M/F/D)

### Information about apprenticeship

**STREICHER**

## The vocational training at a glance

### Tasks

Automotive painters design surfaces; they produce surface coating and applications on vehicles, structures, devices, individual components and series production parts during manufacturing as well as maintenance. They repair, assemble and remove components and systems. Automotive painters carry out their work autonomously and customer-oriented by oneself or in a team, based on the work assignment.

They plan and coordinate their work and define operating steps as well as the required material. They take measures to ensure a safe work place in terms of HSE. Automotive painters also have customer conversations and they check their work to ensure an error-free execution. Furthermore, they document their work, perform quality assurance measures and record the quantities and time required in order to calculate the performance.

### Skills

Mathematical skills are required in order to calculate surfaces, quantities, volumes and weight. Knowledge in physics and chemistry is also important, e.g. for calculating mixtures. Furthermore, knowledge in crafts and technology facilitates the job.

### Training Period

The **training period is 3 years** and takes place in the company and the vocational school.

### Qualification

**CSE** is required.

## Location

The vocational training as automotive painter takes place at our **location in Deggendorf**.
