- Vocational training within the company, the vocational school and training centers

PRECISION MECHANIC, BRANCH OF MECHANICAL ENGINEERING (M/F/D)

Information about apprenticeship

STREICHER

The vocational training at a glance

Tasks

Precision mechanics manufacture precision components for machines and precise mechanical devices and assemble the components to functional units. Thereby, they also install electrical measuring and control components. Therefore, they often use computer-operated machine tools, partially they carry out those works also by hand. Precision mechanics plan work flows, set up machine tools and work on metals by use of cutting processes like rotating, milling, drilling and grinding. Furthermore, they assemble the fabricated machine components and devices, set them up according to their usage and carry out service briefings. In addition, they maintain and repair precise mechanical devices.

Skills

Skills in technical crafts are necessary for assembling machinery, systems and plants. The handling with drafts and technical drawings requires an excellent visual thinking and solid mathematical skills, particularly in geometry and physics.

Training Period

The **training period is 3.5 years** and takes place in the company, the vocational school and training centers.

Qualification

CSE is required.

Location

The vocational training as precision mechanic, branch of mechanical engineering takes place at our **location in Deggendorf**.
