Innovation and investments made in future oriented technologies ensure a constant development of the business activities and guarantee a long-term performance of the STREICHER Group.

- Recognised vocational training in accordance with the German Vocational Training Act (BBiG)
- Vocational training within the company, the vocational school and training centers

MECHATRONIC TECHNICIAN FOR AGRICULTURAL AND CONSTRUCTION MACHINERY (M/F/D)

Information about apprenticeship

STREICHER

The vocational training at a glance

Tasks

Mechatronic technicians for agricultural and construction machinery technology maintain vehicles, machines and systems used on construction sites. They create error and disruption diagnoses in mechanical, hydraulic, electrical and electronic systems, identify failure reasons and correct defects by repairing or replacing the corresponding parts. They dismantle or assemble components and assemblies, process workpieces manually and mechanically and also carry out welding work. In addition, they carry out exhaust emission tests and manufacture automotive electrical power connections. They install plants, put them into operation, test them and instruct the operators and they equip construction vehicles or machines with technical supplies and additional equipment.

Skills

Metal works like welding or drilling are everyday tasks. Therefore, skills in craft and technical knowledge are advantageous. Knowledge in mathematics and physics is necessary since mechatronic technicians for agricultural and construction machinery have to calculate for instance pump performances or electrotechnical parameters and they have to estimate the forces and stability of construction components.

Training Period

The **training period is 3.5 years** and takes place in the company, the vocational school and in training centers.

Qualification

CSE is required.

Location

The vocational training as mechatronic technician for agricultural and construction machinery takes place at our **locations in Deggendorf and Jena.**
