

Headquarters MAX STREICHER GmbH & Co. KG aA, Deggendorf

STREICHER Group

With a history of more than 100 years, the STREICHER Group understands how to combine quality and specialised knowledge with many years of experience in the competence fields pipeline and plant construction, mechanical engineering, civil and structural engineering as well as raw and construction material. MAX STREICHER GmbH & Co. KG aA – the parent company, with its headquarters in Deggendorf, employs more than 3,500 people worldwide.

Innovation and investments made in future oriented technologies ensure a constant development of the business activities and guarantee a long-term performance of the STREICHER Group.

- Recognised vocational training in accordance with the German Vocational Training Act (BBiG)
- Vocational training within the company, the vocational school and training centers

PIPELINE FITTER (M/F/D)

Information about apprenticeship

The logo for Streicher, featuring the word "STREICHER" in white capital letters inside a red circle with a white border.

The vocational training at a glance

Tasks

Before they start laying pipes, pipeline fitters excavate and secure the excavation pit. Then they lower the required piping parts in the pit, therefore, they mainly use standard pipes. They fabricate special components, which can not be obtained in the workshops by themselves. In the excavation pit, they connect the pipe parts to a resilient and primarily a dense pipeline. Depending on the material of the pipe they weld, stick or screw the components. Afterwards they carry out a pressure test, usually with water and fill up the excavation pit. Pipeline fitters also take over repair and maintenance works of pipelines and repair pipe bursts for instance.

Skills

Skills in mathematics are required, when carrying out surveys, surface and volume calculations. Knowledge in physics is important in order to understand the functionality of measuring devices. When working with tools and construction equipment experiences in the field of crafts and technology are helpful.

Training Period

The **training period is 3 years** and takes place in the company, the vocational school and training centers.

Qualification

CSE is required.

Location

The vocational training as pipeline fitter takes place at our **locations in Deggendorf and Jena.**
