Innovation and investments made in future oriented technologies ensure a constant development of the business activities and guarantee a long-term performance of the STREICHER Group.

- Recognised vocational training in accordance with the German Vocational Training Act (BBiG)
- Vocational training within the company, the vocational school and training centers

## ROAD BUILDER (M/F/D)

Information about apprenticeship

**STREICHER**

## The vocational training at a glance

### Tasks

Road builders build main and side roads, pavements and cycle tracks, pedestrian zones as well as motorways and airfields. After staking out of the construction site they start with the excavations. They remove soil, transport them, level and compress them. Therefore, road builders use diggers, caterpillars and rollers. Usually a layer of gravel is put on the compressed subsoil. Then, further rock mixtures follow and at last they put a concrete or asphalt surface on top of it. They also carry out paving work and make edge attachments and drainage ditches. Besides the new construction of roads, they also carry out maintenance and repair works.

### Skills

Fundamental knowledge of mathematics and the basic arithmetic operations are useful when calculating the demand for construction materials. Knowledge of basic principles and connections of physics simplify the understanding of the impact of forces and ways of levers. In addition, knowledge in chemistry is an advantage when preparing material mixtures. Experience in the fields of craft and technology are helpful when working with different tools and machinery.

### Training Period

The **training period is 3 years** and takes place in the company, the vocational school as well as in training centers.

### Qualification

**CSE** is required.

## Location

The vocational training as road builder takes place at our **locations in Deggendorf and Jena.**
