- Recognised vocational training in accordance with the German Vocational Training Act (BBiG)
- Vocational training within the company and the vocational school

CARPENTER (M/F/D)

Information about apprenticeship

The vocational training at a glance

Tasks

Carpenters create all kinds of wooden buildings and wooden constructions. They design and carry out timber engineering structures, roof trusses, timber houses and interior fittings with wooden and dry construction materials. The wooden construction looks back on a very long tradition. But carpenters implement technical innovations and requirements, too. High quality machines and innovative processing methods lead the natural material wood into the future.

Skills

Technical know-how and manual skills as well as sense for design and spatial imagination are the basics for great success in the carpentry hand-craft.

Training Period

The **training period is 2 years** after successful completion of the primary vocational school year and takes place at the company and in the vocational school. During the primary vocational school year, the trainee receives the payment of the first year of training and commits himself in return to work during the school holidays within the company.

Qualification

CSE is required.

Location

The vocational training as carpenter takes place at our **location in Deggendorf**.
